

# COWPEA

## COWPEA - MANNAN

Plant Type	: Bush
Pod Color	: Green
Pod Length	: 28-30 cm
Pod shape	: Curved
Seed Colour	: Brick Red
First Picking	: Starts from 30 - 35 Days After Sowing
Disease tolerance	: Tolerance cercospora leaf spot

## COWPEA - DC - 15

Plant Type	: Bush
Pod Length	: 10 - 12 cm
Pod Shape	: Straight
Pod Color	: Green
Maturity	: Starts from 75 - 80 days (Seeds harvest)
Disease resistance	: Moderately resistance to dry root rot & yellow vein mosaic virus

## COWPEA - WINNER

Plant Type	: Bush
Pod colour	: Green
Pod Length	: 20 - 22 cm
Pod Shape	: Straight
Maturity	: Starts from 45-50 days
Seed Color	: White with black dot
Performance	: High yielding with good adaptability
Disease tolerance	: Tolerance to blight

# COWPEA & CLUSTER BEAN

## COWPEA - ALANKAR

Plant Type	: Bush
Pod color	: Dark Green
Pod Length	: 20 - 22 cm
Pod Shape	: Straight
Maturity	: Starts from 45-50 days
Seed Colour	: white
Performance	: High yielding with good adaptability

## COWPEA - KEERTHI

Plant Type	: Bush
Pod color	: Green
Pod Length	: 36 - 38 cm
Pod Shape	: Straight
Maturity	: starts from 45-50 days
Seed Color	: white with cream
Performance	: High yielding with good adaptability

## CLUSTER BEAN - SHOBHA - 61 RESEARCH

Plant Type	: Non-branching growth habit
Pod color	: Green
Pod Length	: 12-14 cm (average)
Harvest	: First picking starts from 45-50 Days After Sowing (DAS)
Performance	: High yielding with uniform pod development

## CLUSTER BEAN - PNB

Plant Type	: Non-branching
Pod color	: Green
Pod Length	: 12-14 cm (average)
First Picking	: 45-50 days after sowing (DAS)
Performance	: High yielding with uniform production
