

ASHOKA SOYA BEAN JS-335

Plant type	: Erect, compact, and medium-tall with good branching
Pods	: Well-filled, uniform, and densely borne on the plant
Seeds	: Attractive reddish-brown color, medium-sized, and oval in shape
Maturity	: Ready for harvest in 90-100 days after sowing
Yield	: High-yielding variety with excellent seed recovery
Protein content	: High, making it suitable for feed and food processing
Adaptability	: Performs well under irrigated and rainfed conditions

PAPAYA - AFA-1

Plant habit	: Uniform plants
Fruit Shape	: Fruits are oblong shape
Fruit Color	: Orange, firm, aromatic, with less seeds
Fruit weight	: 1 - 1.25 kg.
Performance	: High yielding with good adaptability
Tolerant	: Tolerant to ring spot virus

PAPAYA - RED BEAUTY F1 HYBRID

Plant habit	: Vigorously grown
Flowers	: Hermaphrodite
Fruit Shape	: Oblong
Fruit Color	: Ripen fruits are bright yellow in color, orange with good flavor
Fruit weight	: 1.25 - 1.5 kg
Performance	: High yielding with good adaptability
Tolerant	: Tolerant to ring spot virus

DRUM STICK - PKM-1

Plant Type	: Semi-spreading perennial tree with medium height and profuse branching
Leaves	: Dark green, dense foliage rich in nutrients
Flowers	: Whitish and borne in clusters, promoting good pod setting
Pods	: Long, slender, and uniform; dark green in color.
Pod Size	: Average length 45-60 cm, with smooth surface and fleshy pulp
Yield	: High-yielding variety producing 200-250 pods per tree per year
Maturity	: First harvest in 6-8 months after planting
Taste	: Tender, non-fibrous, and highly suitable for culinary and market use
